DETAILED ACTION

Request for Information

1. Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application.

In response to this requirement, please provide the title, citation and copy of each publication that any of the applicants relied upon to draft the claimed subject matter. For each publication, please provide a concise explanation of the reliance placed on that publication in distinguishing the claimed subject matter from the prior art. In particular, the examiner requests a copy of the relevant portions of the document(s), if any, used to prepare the drawings and tables of the present invention.

In responding to those requirements that require copies of documents, where the document is a bound text or a single article over 50 pages, the requirement may be met by providing copies of those pages that provide the particular subject matter indicated in the requirement, or where such subject matter is not indicated, the subject matter found in applicant's disclosure.

The fee and certification requirements of 37 CFR 1.97 are waived for those documents submitted in reply to this requirement. This waiver extends only to those documents within the scope of this requirement under 37 CFR 1.105 that are included in the applicant's first complete communication responding to this requirement. Any supplemental replies subsequent to the first communication responding to this

requirement and any information disclosures beyond the scope of this requirement under 37 CFR 1.105 are subject to the fee and certification requirements of 37 CFR 1.97.

This requirement is an attachment of the enclosed Office action. A complete reply to the enclosed Office action must include a complete reply to this requirement. The time period for reply to this requirement coincides with the time period for reply to the enclosed Office action.

Drawings

2. This application lacks formal drawings. The informal drawings filed in this application are acceptable for examination purposes. When the application is allowed, applicant will be required to submit new formal drawings.

The drawings are objected to because the drawing views have not been numbered in accordance with 37 CFR (u) (1).

Specification

3. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3 and 10-11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Simms et al., U.S. 6,161,155.

Simms et al. clearly teach the invention in Figure 1, wherein a memory (*Storage Register 33*) for holding packets holds at least one packet (*Data Packet A and Data Packet B*) and only one boundary indicator (*EOB*).

Simms et al. clearly teach the use of a memory controller (*note the various control devices within tape drive memory controller 24*).

Simms et al. clearly teach storing the boundary indicator in the memory after a predetermined number of bits have been stored in the memory (*note column 4, which states, "data packet B was received over the D8-D15 data lines. After receiving these data packets, data packet B was determined ... to be an EOB data packet ... because data packet B was determined to be an EOB data packet the bit is set as shown"*).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2186

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simms et al., U.S. 6,161,155, in view of either Lynch et al., U.S. 6,078,587 or Boddu et al., U.S. 5,974,511.

Simms et al. teach a Buffer Memory 8 for buffering data from Tape 20, but fail to explicitly mention the use of Buffer Memory 8 as a cache. However, each of Boddu et al. and Lynch et al. teach the claimed use of caches to hold packets in systems that were compatible with Simms et al.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize the Simms et al. Buffer Memory 8 as a cache memory in the manner of the Boddu et al. or the Lynch et al. systems, since (1) Buffer Memory 8 was already a smaller, faster memory configured to store a subset of the data stored in the tape drive memory, and (2) the benefits of caching for efficient data retrieval were well known at the time of the invention.

Allowable Subject Matter

8. Claims 5-9 and 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is a statement of reasons for the indication of allowable subject matter: although each of the Boddu et al. or the Lynch et al. systems taught the validation of data within the cache lines in a packet data transfer system (note the respective Abstracts), neither taught the feature of storing *within the cache line* an indication of how many bits within that same line were valid

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. This Office action has an attached requirement for information under 37 CFR 1.105. A complete reply to this Office action must include a complete reply to the attached requirement for information. The time period for reply to the attached requirement coincides with the time period for reply to this Office action.
